PROJECT SPECIFICATION

# Build a Portfolio Site

## Design

| CRITERIA | MEETS SPECIFICATIONS |
| --- | --- |
| Required Elements | The page at minimum includes all of the following:<br><br>• at least 4 images<br>• title text (h1, h2, etc.)<br>• regular (paragraph) text<br>• a logo. |
| Semantic HTML | HTML5 semantic tags such as `<header>`, `<footer>`, `<article>`, `<section>` etc. are used to add meaning to the code.<br><br>No `<div>` or `<section>` tags are without a `CSS` class or id.<br><br>Check out the W3C documentation on HTML Structural Elements to learn more! |
| Custom Design | Provide at least one of the following customizations:<br><br>• Customize images and text.<br>• Customize placement of the elements on the page (grid layout) with `HTML`, `CSS` or both.<br>• Customize `CSS` styles applied at minimum to paragraph and heading elements. |
